JCM Global's DBV[®]-400 series has been meticulously developed based on our 25 years of experience in bill validation technology.

Highly secure and created for durability, the DBV-400 defeats cheats and keeps transactions and cash storage safe. The robust design is built with a thick plastic frame making it both long-lasting and lightweight. A choice of cash box options makes the DBV-400 the best solution for a wide range of automated payment applications. DBV-400 accepts banknotes up to 72mm wide.

State-of-the-art, high-precision sensor technology protects operators, and a banknote-to-banknote speed of less than 1.7 seconds keeps consumers happy. Its design keeps dust and liquid out, and a sleep mode provides minimal power consumption in idle status.
