iVIZION CONNECTED

- Enables server to record image scans of bills and tickets to easily resolve last bill disputes
- Real-time security alerts
- Multi-currency acceptance possible
- 2D barcode reading
- Predictive maintenance
- Predictive drop scheduling
- Firmware download scheduling

GEN5 CONNECTED

- Enables dynamic graphics printing on the fly
- Allows CMS to target specific players with promotions
- Ticket template creator and graphics printing allow endless ticket formats
- Print system-generated tax forms

CMS CONNECTED

- EGM becomes a limitless gaming kiosk, offering access to state & national lotteries, in-house sport and race books, Daily Fantasy Sports, currency exchange databases and more
- Increased revenue and greater operational efficiencies and accountability

IMAGINE A WORLD where the slot machine can be utilized in new ways to unlock greater value for you and for your players. That is the game-changing technology called **FUZION[®]**, a patented technology. When you connect JCM's **iVIZION[®]** bill validator and **GEN5[™]** printer to your compatible back-end CMS, you unleash the power of **FUZION**.

Every machine on your slot floor could deliver a server-driven suite of player-focused, revenue driving features. **FUZION** turns every slot machine into a multi-line profit center, with slots, sports book, promotions and lottery tickets at your player's fingertips. **FUZION** is at the core of the future-ready casino floor.

WITH FUZION you allow your players to interact with the game in new and unique ways. From cutting edge, state of the art slot platforms to legacy and classic machines, FUZION brings the future to your players now.

HIGHLIGHTS

■ Security

- Real-time alerts for money laundering (AML) and other suspicious activities.
- Serial number tracking for detailed reporting of cashbox contents.
- Soft dipswitches to change bill validator settings remotely.
- Bill image database for transaction history of every machine.

■ Increased Efficiency

- Download firmware to any printer or bill validator. Entire sections of the floor can be upgraded within minutes.
- Peripheral Health Monitoring to increase performance and reduce downtime.
- Improve cashbox collection performance by targeting near-full cashboxes, preventing future E-drops.
- W2-G Forms – Optimize the jackpot hand pay process by printing the necessary W2-G form at the machine with pre-populated player data.

■ Boost Revenue

- Turn any machine into a terminal by printing and redeeming tickets for external systems (lottery, sports, pari-mutuel, fantasy sports).
- BV Currency Conversion – Accept multiple currencies and uses conversion rates from the system to keep track of multiple exchange rates.

■ Targeted Marketing

- Promotions – All promotions from the CMS system can now be delivered directly to the player, regardless of the player being carded or uncarded. This enables the system to deliver personalized, effective promotions.
- Enhanced ticket templates – FUZION delivers server based graphic templates that can be updated as often as needed. High quality graphics is another way to enhance the customer experience.

■ Mobile Integration

- Mobile Wager Wallet – Allow players to transfer funds from their phone for use at the gaming machines.
- Mobile user interface – Even machines that don't have a CMS service window could use a mobile application to interact with the premium FUZION features, allowing legacy equipment to deliver on customer convenience.
- iPromo delivers promotional offers and player incentives for use at the property through a mobile device.
- iTITO virtualizes TITO tickets, reducing cost and increasing operational efficiency. Tickets are stored in a player's mobile account which can be redeemed at a machine.
